# STRUCTURAL INTERIOR DESIGN (SID) NARRATIVE

Interior finishes in the X-70 Interior Renovation have been selected on the basis of their durability and to provide a clean, modern aesthetic to the space.

The primary floor finish in the facility throughout the Corridors, Offices, and Consultation Rooms will be carpet tile. The Exam Rooms will have Solid Sheet Vinyl with integral base. The back portion of the Corridor will be Solid Vinyl Tile. All other area will have existing flooring to remain

Rubber base will be used throughout the renovated spaces, except in the exam rooms where an integral solid vinyl base will be used and those areas where existing finishes will remain.

Walls will be painted with a general and accent color.

The ceilings in areas with new interior finishes will be Acoustical Ceiling Tile. The ceilings in all other spaces will be existing to remain.

Cabinetry in the Lab will be High Pressure Laminate with Solid Surface countertop.

Exterior window shades will be existing to remain. All doors will be existing to remain.
